Viewed inthe most popular Adobe Acrobat viewer which most computers have already; to download the free viewer, go to www.adobe.comAbout Kubota EnginesThe company was establishedin 1890 as a manufacturer of cast iron water supply pipelines and ever since, Kubota has continuously contributed to the progress ofsociety through its manufacturing activities and technological developments. In the 1920's, Kubota developed and produced the company's firstcompact kerosene engines primarily for agricultural use. In the 1930's, Kubota startedproducing their first diesel engines to meet the needs of people who demanded more powerful engines. Throughout the years, Kubota has alwaysproduced the most technologically advancedengines possible.In 1937 Kubota established their Sakai Japan Plant for theexclusive production of engines in Japan. In 1958 production of their horizontal type diesel engine with a radiator started. Their success in the engine arena led to the establishment of Kubota Engine Division in 1981. Kubota celebrated their10-millionth engine produced in 1987, and just 5 years later celebrated the overall

production of 20-million engines! Today, society is becoming more concerned with energy and environment preservation. This should lead to greater demands for even higher quality, more fuel efficient and much more versatile engines.

Anticipating such needs, the Kubota Engine Division continues its research and developing ways to produce the best engine possible. Their mission for compact diesel engines, is to strive for and attain the ultimate engine

manufacturing technology. Kubota Engine Models include: D905 D1005 D1105
